OLIVEM® 300

Olivem® 300 is a water- and oil-soluble functional lipid. Its skin compatibility and sebum-recovering power are a result of its olive oil origins, which lead to strong, safe emolliency.

It adds mildness to formulations, and helps protect the skin from delipidification and irritation caused by surfactant cleansing. Olivem® 300 is a brilliant way to get olive oil benefits for all your formulations, including toiletries!

Thanks to its unique composition, Olivem® 300 provides a nice and unique skin after-feel, and additional emolliency to shampoos, toiletries and skin care formulations. It is a solubilizer for fragrances and essential oils.

NON-IRRITANT CHARACTERISTICS

Olivem® 300 has a high level of dermatological compatibility.

- Patch test
- 20 healthy subjects
- 48 hour contact with the product tested at 100%

Results:

	Index	Classification
15 min after patch removal	0.05	not irritant
24 hour after patch removal	0.05	not irritant
