BIOCHEMICA® ARGAN SHINE

Biochemica® Argan Shine provides a new, multi-functional solution for all hair types. This innovative product exploits the healing properties of rich, non-greasy Moroccan argan tree seed oil. The result is a luxurious, carefully crafted ingredient that offers an effective way to convey the benefits of precious oils. It delivers luminous shine to hair care products naturally, without using silicones, and improves hair comb-ability.

GLOSS EFFECT

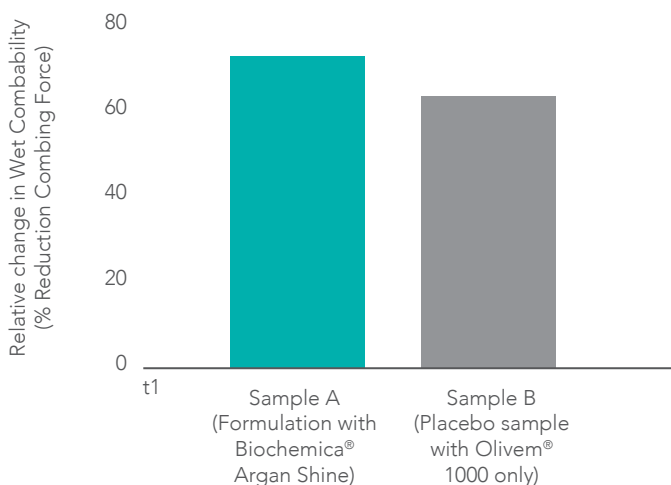

Hair gloss assessment: Triangle test ISO 4120:2004

When used in a rinse-off hair mask formulation, Biochemica® Argan Shine generates a gloss effect similar to argan oil and silicones.

WET COMBABILITY

Adding 2% Biochemica® Argan Shine to formulations reduces wet combing force by 20%.

When used in a rinse-off hair mask formulation, Biochemica® Argan Shine 2% generates a significant increase in wet combability with respect to the placebo with Olivem® 1000 3% only.
