Insoluble In	Water
Soluble In	Cosmetic esters, vegetable oil
Packaging	Pail - 25kgs

BENEFITS

- Anti-inflammatory agent
- Anti-oxidant
- Biodegradable
- Bodying agent
- Emollient
- Calming effect
- Hair conditioning agent
- Healing promotion
- Moisturizing agent
- Natural product
- Skin hydration agent
- Skin protectant

CLAIMS

Moisturizes and protects babies' skin against dryness, leaving it smooth and soft.

Continuously replenishes moisture to the deepest layers of skin for long-lasting hydration while soothing multiple skin problems such as redness and itchiness caused by dry weather.

Replenishes moisture and offers tender care that soothes and balances skin, leaving it elastic, radiant and resilient for a refreshed finish.

APPLICATIONS

Foot care

Facial skin care

Hand and body care

Lip care

Facial masks

Hair conditioners and shampoos

Liquid handsoaps

Cleansing wipes

Baby care

Shower gels and body washes

FORMULATED SOLUTIONS

Baby Talc Cream

Wrap your baby in nurturing, silky-softness with soothing Baby Talc Cream. Unlike common talcum powder, it is applied precisely to the desired area without dispersing powder granules, which may settle in the lungs and cause breathing problems for the infant. It is also enriched with EuroI® BT and Biochemica® Chamomile Butter for healing and relief from inflammation and irritation. Olivem® 1000 and Sensolene® moisturize, soften and enhance skin's hydrolipid film.

ANCIENT ORIGINS

Biochemica® Chamomile Butter contains an extract of whole *Chamomilla Recutita*, (*Matricaria*), also known as the German chamomile flower. The plant is native to western Europe, India, and western Asia. Dating back to the second century, it was revered as one of nine sacred herbs by the Germanic people. It now grows freely across the globe and is valued for its calming effects.
